Crusaders of "Lost Idols" has just been Launched on iPhones and Android-powered devices, and it's 80% of one of the best idle clicks I played, and I played a ton of them! The game is complex, challenging and addictive so much that you should prepare to spend in several hours in front of his exhibit, playing the game. And I'm here to help make this much better Experience to share with you some Crusaders lost idols cheats and tips in a guide. Estrata complete magician. This is intended primarily for beginners guide (we have one for advanced players arriving), but experienced should Reads it bem. - Who knows, there might be a tip or trick here that you do the game was aware of it! Enta, without further ado, lethal success check below some Crusaders lost idols tips, tricks and cheats! UPDATE: Many people are wondering how to get the Talent (and idols). You can trust them while playing the game. You need alcançar the navel 150 with the cross that you can unlock (Nate) and restart the world, beating the Earth Globe Acone in the upper right of the screen. However, to actually buy the talents with the idols, you Tamba must come to an area específica, the first being Area 150. 1. How to choose the best cross for your form? Even if the Ignatius, to start the game or after restarting, you won't have much choice, soon you will find that you have crossed more than those that you can actually use. The cross powers and different purposes and in different uses, them combined means can mean the difference between a painfully slow progress or a race through levels. Therefore, the vital strengths of each of their Crusades, and especially how the abilities they unlocked unlocked that reached the necessary rivers. For most of the time, you'll want crusaders that increase the damage of all the other crusaders in the team in order to take the maximum advantage of the game. For this reason, despite the fact that the first Crusader you started, Jim the Lumberjack is absolutely unbelievable as he finally opens the ability that increases the damage of all the crusaders in the same column as yours by 50% (then place it in the first column). Pair it with Sasha, who is placed in front for an extra 30% damage, then keep the likes of princess and the Prince Salt around and you'll get gigantic increases for your general DPS. So check out all your heroes, see what your strengths and play with your placement in your form. sometimes simply switching two between then can give you a huge DPS boost! 2. You can remove Bush Whacker The good about the game is that it allows you to replace even the main hero with Bush Whacker, which is the hero that decides how much damage by tapping it to cause. It's a great deal to always remove the Bushwhacker from your lineup when you leave the game or when you're not actively playing (playing), because, of course, without it in the form, if you touch it, you cause zero damage. The only time you should have Bush Whacker in your when fighting bosses in order to utilize the skills and improve your chances of winning. 3. Keep an eye on XP points experience points are also an extremely interesting and useful thing: for every 5 hours a crusader spends in its form, he or she receives 100% damage per second damage. Xp points do not reset when you restart the world, so this is only for the current game. Therefore, know which hero you will use the most and try to offer them the maximum of time in the form as possible in order to maximize your impulses in the long run. 4. Don't use your chandeliers It makes absolutely no sense to use Buff before level 50 (and cover increases with each because it will just be a wasted buff, since it only gets a little in return. Try to hold on to your buffs for as long as possible and use them when they really matter, keeping in mind that those who give you financial benefits (such as the ones from time forward) are based on the level you are at, so the higher the level at which you use them, more rewards you will receive. 5. When you start the game, opening your breasts as soon as possible is important because you want all the equipment you get. But later, you should try to cling to your chest as much time as possible: the moment when the ark opens is important, not the moment you receive it. In other words, if you open an ark that you have received after defeating the head of level 5 when it reaches level 49, the gold rewards will match the values of level 49. So try to hold on to the ark as long as possible after opening the first 5 and opening them when you hit a wall: the gold recipe will help you update your Crusaders faster and progress faster! 6. Maximize the revenues of Each Number Of The Number of Oils That Receives When It Restarts based on the cumulative number number you have purchased for all your Crusaders. For every 500 years gets 1 extra dolo - so Jim at the 300 level and Khouri at the 200 level will mean 1 Dolo. Does this mean you should make sure that you raise all your Crusaders as high as possible before leveling up?" and should obviously focus on beginners or those who haven't updated too much because they haven't used it in the game: the more levels, the more oils get! These would be for now our tips and tricks for the Crusaders of the Lost Brothers. If you have additional advice to share with us, please let us know by leaving a comment below. Touch, Tap, Play is looking for experienced writers to produce popular title guides for Mobile and Nintendo Switch.
